Diego Cardoso

Full Stack Developer | Python & Django | Next.js & TypeScript | Process Automation

diegocardoso117@gmail.com | Patrocínio, MG, Brazil | linkedin.com/in/diego-cardoso-534559203 | github.com/DiegoCard117 | balanceinvest.app

SUMMARY

Full-Stack Developer focused on Python/Django and process automation, with additional experience in Next.js/TypeScript for multicultural teams. Two-year track record in IT, evolving from technical support (Tier 1/2) and infrastructure administration into web application development, APIs, and automation (Selenium, PyAutoGUI). Creator of Balance, a Django-based SaaS for multi-market (Brazil/US/Crypto) investment rebalancing with 300+ automated tests, 2FA authentication, i18n, and production monitoring.

PROFESSIONAL EXPERIENCE

Sicoob Coopacredi — Full-Stack Developer May 2026 – Present

Patrocínio, MG, Brazil · formal title: Corporate Performance Analyst

- Build web applications in Python, Django, HTML, CSS and JavaScript across front-end and back-end.
- Design and maintain REST APIs; model and optimize MySQL queries.
- Implement process automation with Selenium and PyAutoGUI, cutting down repetitive manual tasks.
- Integrate internal systems, fix bugs, and ship new features with a focus on performance and quality.

Sicoob Coopacredi — IT Support Assistant October 2024 – May 2026

Patrocínio, MG, Brazil

- Provided technical support and managed users and equipment across the IT operation.
- Administered Active Directory and network infrastructure.
- Handled incident resolution, process standardization, and continuous improvement.

Solvpro Tecnologia LTDA — Mid-level Front-End Developer June 2025 – January 2026

Remote · concurrent second role alongside Sicoob

- Built interfaces with Next.js (SSR, SSG, dynamic routes) and TypeScript for domestic and international clients.
- Integrated Supabase (Edge Functions, Auth, REST APIs) and Firebase (Auth, Firestore, Cloud Functions).
- Built reusable design systems with Tailwind CSS, applying technical SEO, accessibility (a11y), and performance best practices.
- Took part in English-language meetings and alignments with multicultural teams.

Hospital Santa Casa de Patrocínio — IT Support Assistant December 2023 – September 2024

Patrocínio, MG, Brazil

- Supported infrastructure, networks, servers, and systems, including the RM TOTVS ERP.
- Developed small internal web and desktop applications.
- Handled data analysis and Tier 1/2 incident resolution.

PERSONAL PROJECT

Balance — Sole creator and developer balanceinvest.app

- Multi-market (Brazil, US, and Crypto) investment-rebalancing SaaS, built solo from the backend to the production deploy.
- Stack: Django, Python, PostgreSQL, Tailwind CSS, Nginx, Redis, GitHub Actions (CI/CD), Sentry.
- Automatically calculates the contribution amounts needed to keep portfolio allocation on target, using real-time quotes (BRAPI, Yahoo Finance, Binance).
- Generates Brazilian income tax reports and US Capital Gains (Schedule D) reports; 2FA authentication; PT-BR/EN i18n; subscriptions via Mercado Pago (PIX and recurring card).
- 300+ automated tests; production error monitoring with Sentry.

EDUCATION

UniCesumar — B.Sc. in Software Engineering, Information Technology June 2025 – December 2028 (in progress)
Escola Estadual Joaquim Botelho — High School Diploma

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java
Back-end: Django, REST APIs, Node.js (Firebase/Supabase Functions)
Front-end: Next.js, React, Tailwind CSS, HTML5, CSS3
Databases: PostgreSQL, MySQL
Automation: Selenium, PyAutoGUI
Infrastructure: Active Directory, Networking, Servers, Linux, Windows Server
DevOps: Git/GitHub, GitHub Actions (CI/CD), Nginx, Redis, Sentry
Auth / Integrations: Firebase Auth, Supabase Auth, 2FA, Mercado Pago
Spoken languages: Portuguese (Native), English (Professional Working Proficiency)
